

CLIMATE OF THE 21st CENTURY - Changes and Risks

Content

Scenarios of Anthropogenic Climate Changes - A continuing challenge for sciences (Graßl)

1 CLIMATE AND ITS VARIABILITY

- 1.1 Climate and Climate System (Hupfer)
- 1.2 The Significance of the General Circulation in Atmosphere and the Ocean for Climate (Steinrücke)
- 1.3 Effect of Earth Orbital and Solar variability on Climate (Mende & Stellmacher)
- 1.4 The Volcanic Impact on Global Atmosphere and Climate (Sachs & Graf)
- 1.5 The Carbon Cycle within the Climate System (Würth, Häger & Kohlmaier)
- 1.6 El Niño/Southern-Oszillation-Phenomenon (Latif & Endlicher)
- 1.7 The History of Climate from the Early Stages of the Holocene (Ehlers)
- 1.8 Causes of Climate Changes in the Quaternary (Wefer)
- 1.9 The Ice of the Earth (Herterich)
- 1.10 Climate History of the last 40,000 Years in the Old World (Frenzel)
- 1.11 Influence of Climate Change on the Upper Timber Line in the Alps since the Last Glaciation (Pott, Bauerochse & Katenhusen)
- 1.12 Dendroclimatology of the last 12,000 Years (Frenzel)
- 1.13 Influence of the Climate on the History of Humankind (Lozán)
- 1.14 Responses of Lakes to Climate Variability (Lozán, Merkt & Pachur)

2 ANTHROPOGENIC INFLUENCE ON THE CLIMATE

- 2.1 Observed Climate Change within the 19th and 20th Century: Danger Ahead? (Schönwiese & Hupfer)
- 2.2 The Natural and Anthropogenic Greenhouse Effect - Changing Chemical Composition of the Atmosphere due the Human Activities (Seiler & Hahn)
- 2.3 Air Traffic and Climate (Schumann)
- 2.4 Role of Natural and Anthropogenic Tropospheric Aerosols in Climate Evolution (Schulz)
- 2.5 Depletion of Ozone in the Stratosphere (Wahner)
- 2.6 Formation of Surface Layer Ozone and Development of Summer Smog (Fiedler)
- 2.7 The Role of Land Use for Climate Change (Hüttl, Bens & Schneider)
- 2.8 Changes of the Forest (Dörfler & Mitlöhner)

3 CLIMATE OF THE 21ST CENTURY: CHANGES AND CONSEQUENCES

- 3.1 Natural Climate Variability and Anthropogenic Climate Change (Hegerl, Hasselmann & Latif)
- 3.2 Conditions and Potentials for Climate Projections (Gerstengarbe)
- 3.3 Change in the General Circulation of the Atmosphere (Roeckner)
- 3.4 Simulations of Regional Climate Change (Cubasch)
- 3.5 Is the Hydrological Cycle Intensifying? (Jacob)
- 3.6 Statistical Investigation of Precipitation Changes from the a Hydrological Viewpoint (Bardossy)
- 3.7 Water Cycles in the Climate System (Raschke & Warrach)
- 3.8 The Alternative: Natural Climate Change - Do we have to expect a New Glacial? (Thiede & Tiedemann)
- 3.9 Changes in North Atlantic (Latif & Meincke)
- 3.10 Implications of Climate Change on Sea Level (Sterr)
- 3.11 The Response of Polar Sea Ice to Climate Variability and Change (Eiken & Lemke)
- 3.12 Glaciers as Key Indicator of Global Climate Change (Haeberli, Hoelzle & Maisch)
- 3.13 Changes of the Polar Ice Sheets (Huybrechts)

- 3.14 Climate Change and its Consequences for Permafrost (Siegert & Hubberten)
- 3.15 Desertification (Pilardeaux & Schulz-Baldes)
- 3.16 Sensitivity of Mountain Regions to Climate Change (Beniston & Haeberli)
- 3.17 Coastal Zones at Risk (Sterr)
- 3.18 Case Study: The Effects of the Extreme Hot- and Dry-Summer of 1992 in North Germany (Kartschall & Flechsig)
- 3.19 Extremes and Climate Change (Cubasch & Kasang)
- 3.20 Change of the Global Vegetation (Claussen & Cramer)
- 3.21 Response of Marine Phytoplankton to Carbon Dioxide Increase (Riebesell)
- 3.22 The Role and Development of Coral Reefs (Reinicke & Schuhmacher)
- 3.23 Natural and Anthropogenic Variability in the Arctic Marine Ecosystem (Gradinger)
- 3.24 Birds and Climate Change (Bairlein & Winkel)
- 3.25 The Effect of Climate on Fish Population (v. Westernhagen & Schnack)
- 3.26 Inlands Water and Climate Variations (Hupfer)
- 3.27 Interaction of Climate and Biodiversity
- 3.28 The Effects of Increased Ultraviolet-B Radiation on the Biosphere (Forster & Kestler)
- 3.29 Change in the Occurrence of Plant Diseases, Pests, and Beneficials (Jahn & Freier)
- 3.30 The Impacts of Sea-Level Rise on Coastal Flora and Fauna (Neuhaus, Dykema & Reinke)
- 3.31 Climate Change and Water Availability (Hoff)
- 3.32 Consequences for Agriculture and Forestry (Hörmann & Chmielewski)
- 3.33 Diseases and Climate Change (Dobler & Jendritzky)
- 3.34 Hazards by Enhanced UV-Irradiation (Greinert, Breitbart & Volkmer)
- 3.35 Urban Climate und Global Climate Change (Kuttler)
- 3.36 Does Climate Change lead to Violent Conflict? (Sprinz)

4 WHAT IS DONE?

- 4.1 International Climate Protection - Rio, Berlin and Kyoto (Singer)
- 4.2 The Politics of the Science of Climate Change (Helm & Schellnhuber)
- 4.3 International Climate Protection Agreements, Protocols, and Regional Accords (Müller-Kraenner & Grittner)
- 4.4 Economics, Climate Change, and the Economy (Müller & Müller)
- 4.5 Legal Outline (Kloepfer)
- 4.6 Energy Consumption and Kyoto Protocol (Pankrath)
- 4.7 Enhancing the Carbon Dioxide Sink Potential (Augustin & Eschner)
- 4.8 Challenges to the Protection of Coasts and Islands (Schirmer)
- 4.9 Climatic Change: Effects on and Possible Responses by the Insurance Industry (Berz)

5 SUMMARY: WARNING SIGNALS FROM CLIMATE (HUPFER, LOZÁN & GRASSL)

6 OUTLOOK: STRATEGIES FOR CLIMATE RESEARCH AND CLIMATE PROTECTION (GRASSL)

7 GLOSSARY
